79-F-1

Triumph

April, 1979

SUBJECT:

FRONT SUSPENSION BLOCKS

MODELS:

TR7

Since production of the TR7 has now resumed at Canley, you will soon be receiving new vehicles. We would like to take this opportunity of reminding you that wood blocks are still utilized in the front suspension to prevent possible damage during transportation.

It is absolutely essential that these blocks are removed as part of pre-delivery inspection. Please ensure that all workshop personnel are familiar with this procedure.

IMPORTANT NOTE: Vehicles must not be driven at more than 10 m.p.h. with the blocks in place.
