# Hunter...look to the leader

10/6/80

## WHEEL ALIGNERS

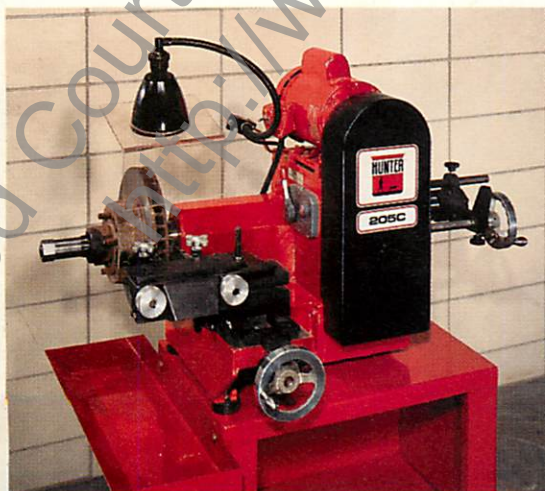

Hunter has them all...from the top-of-the-line, computerized four-wheel alignment system for the high-volume shop, to economical mechanical instrumentation for the shop that performs only an occasional wheel alignment. All offer the quality, dependability and accuracy you expect from Hunter equipment.

Model S7S-TA Electron-A-Line

## ALIGNMENT RACKS

Hunter offers a complete line of racks, wheel stands and pits to fit any bay and accommodate nearly every size vehicle. Optional accessories give Hunter racks the ability to perform a multitude of services in addition to wheel alignment.

Model D2 Lift Rack

## BRAKE LATHES

Hunter's offering of brake lathes makes it easy for any shop to expand into the profitable brake service business. Whether it's a complete Brake Shop which turns drums and rotors simultaneously, or a single machine, Hunter offers the most rugged, reliable brake equipment available.

Model 205C Brake Lathe

## COMPUTERIZED WHEEL BALANCERS

For the shop that wants the latest in wheel balancing technology, Hunter offers the System 700 series of computerized electronic off-the-car balancers. These money making balancers are fast, accurate and dependable—designed to meet today's complex balancing needs.

Model 713 Wheel Balancer

## SPIN BALANCERS

No shop is complete without an on-the-car spin balancer. Hunter offers two types—the Tune-In mechanical and the electronic strobe. By eliminating imbalance as the wheel spins on the vehicle, these balancers offer the ultimate proof of a balanced wheel.

Model 98B Wheel Balancer

## HUNTER . . . THE LEADER

The right products at the right prices—and nation-wide sales and service teams to back them up—are only part of what makes Hunter the leader.

The other part is innovative engineering. Engineering aimed at servicing the vehicles of the 80's, improving your operation, and increasing your profit.

Contact your Hunter sales representative or distributor today and get all the details.
